

Advantages of Heating with Wood Pellets

- Wood pellets are a biomass fuel made up of compressed forest industry byproducts including woodchips and sawdust.
- The pellets are uniformly sized; and easy to store and use.
- Pellets are a clean-burning, renewable, local fuel source.
- Pellet prices are stable compared to fossil fuel prices.
- Average heating costs for biomass fuels are 25% - 50% less than fossil heating fuels.

If you haven't already done so, please sign up for our email newsletter to keep in touch. You can do that at our website or Facebook page, or by scanning the QR code below with your smartphone and following the prompts.

Sincerely,

The Hubbard Family
